## *Product List – Industrial Cleaning*

The industrial cleaning line offers robust solutions for the toughest cleaning challenges in factories, warehouses, and food processing facilities. With heavy-duty degreasers, alkaline cleaners, and specialized solvents, this range tackles grease, grime, and contaminants, ensuring safety and cleanliness in even the most demanding industrial settings.

---

### Liquid Laundry Detergent

A powerful liquid detergent formulated for industrial laundry applications. It removes tough stains and leaves fabrics clean and fresh.

---

### Safety Bleach

A powerful bleach that improves whites on natural and synthetic fibers without damage, though caution is advised for wool and silk. It effectively removes tough stains, including red wine and dye marks, and contains oxidizing agents and enzymes to tackle stubborn stains on both white and colored garments.

---

### Oxyclean

A versatile oxygen-based bleach designed to remove tough stains from both white and colored fabrics. It is safe for use on most natural and synthetic fibers, providing a deep clean without damaging garments. Oxyclean is effective on a wide range of stains, including grease, coffee, and wine.

---

### Superior

Superior is a highly concentrated heavy-duty liquid detergent/degreaser formulated for the safe and effective removal of grease and grime from any surface.

---

---

### **Ethanol Solution 70%**

Our Ethanol 70% is derived from Australian distilled sources guaranteed to contain at least 70% (v/v) pure Ethanol. Ideal for disinfecting a variety of surfaces, quick drying, and effective at killing germs.

---

### **Ethanol Solution 95%**

A high-concentration ethanol solution ideal for disinfection and sanitization in industrial settings. It evaporates quickly, leaving surfaces clean and sanitized.

---

### **Chlorokleen**

Chlorokleen is a concentrated chlorine-based detergent containing 5% available chlorine. It is formulated for safe usage in cleaning and sanitizing abattoirs, food processing plants, and other food-related operations.

---

### **Greasekleen**

Greasekleen is a concentrated heavy-duty degreasing agent, formulated for the food industry where food preparation surfaces and areas, as well as food processing equipment, need to be kept clean. It excels in removing animal fats and oils.

---

---

### **Fabric Washing Detergent**

A specialized detergent formulated to clean and maintain the integrity of fabrics in industrial washing machines.

---

### **Wax Removal Solution**

An effective solution designed to remove wax buildup from floors and surfaces, restoring them to their original condition.

---

### **Isopropyl Alcohol Solution 70%**

A versatile isopropyl alcohol solution ideal for cleaning and disinfecting surfaces. It evaporates quickly, leaving no residue.

---

### **Isopropyl Alcohol Solution 99%**

A high-purity isopropyl alcohol solution used for disinfecting, cleaning, and degreasing surfaces. It evaporates quickly, leaving no residue, making it ideal for sanitizing medical instruments, electronic devices, and industrial equipment.

---

---

**Super Bright Laundry Powder**

A laundry powder designed for industrial use that ensures whites and colors remain bright while effectively removing tough stains.

---

**Softening Agent**

A fabric softener designed for use in industrial laundries, leaving fabrics soft, fresh, and easy to manage.

---

**Neutral Sanitizer**

A neutral pH sanitizer suitable for use on a wide range of surfaces, providing effective germ-killing action without damaging materials.

---

**Shining Cleaner**

A cleaner that not only removes dirt and grime but also leaves a polished, shiny finish on surfaces

---

---

### **Multi-Purpose Cleaner**

A versatile cleaner suitable for a wide range of industrial applications, from floors to machinery. It cuts through grease and dirt effortlessly.

---

### **Heavy Duty Degreaser**

Formulated to tackle tough grease and grime, this heavy-duty degreaser is perfect for industrial settings where powerful cleaning is necessary.

---

### **Chlorine Foam Cleaner**

A high-foam chlorine-based cleaner ideal for sanitizing and disinfecting surfaces in food processing and other industrial settings.

---

### **Alkaline Surface Cleaner**

A strong alkaline cleaner designed for industrial surfaces, effectively removing grease, oil, and other stubborn contaminants.

---

---

### **Green Tea Handwash Foam**

A foaming hand wash enriched with green tea extract, providing a refreshing and cleansing experience while being gentle on the skin.

---

### **CIP Booster**

A cleaning-in-place (CIP) booster designed to enhance the effectiveness of existing cleaning systems, ensuring thorough cleanliness in industrial settings.

---

### **Quaternary Ammonium Cleaner**

A quaternary ammonium compound-based cleaner and disinfectant that provides effective germ control in a variety of industrial settings.

---

### **Chlorine Gel Cleaner**

A thick gel cleaner with chlorine, designed for vertical surfaces and areas where extended contact time is required.

---
